Sequence 11, Application US/08123161A

Patent No. 5446516

GENERAL INFORMATION:
APPLICANT: Campbell, Kevin P.
APPLICANT: Roberds, Steven L.
APPLICANT: Integration, Richard D.
APPLICANT: Integration, Oxana B.
TITLE OF INVENTION: NUCLEIC ACID ENCODING DYSTROPHIN-ASSOCIATED
TITLE OF INVENTION: PROTEIN
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSEE: Kevin M. Farrell, P.C.
STREET: P.O. Box 999
CITY: York Harbor
                                                                                               APPLICANT: Derti, Adnan
APPLICANT: Derti, Adnan
APPLICANT: Ford, Donna M.
APPLICANT: Ford, Donna M.
APPLICANT: Eva's, Marcia E.
APPLICANT: Eva's, Marcia E.
APPLICANT: Schlegel, Robert
TITLE OF INVENTION: NOVEL HUMAN GENES AND GENE EXPRESSION
TITLE OF INVENTION: PRODUCTS
FILE REFERENCE: CCD-257 (US)
CURRENT APPLICATION NUMBER: US 60/088,801
CURRENT FILING DATE: 1999-0-6-10
MUMBER OF SEQ ID NOS: 850
NUMBER OF SEQ ID NOS: 850
SOFTWARE: FaetSEQ for Windows Version 3.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               RESULT 9

US-08-047-033-5

i Sequence 5, Application US/08047033

i Patent No. 5444157

i GENERAL INFORMATION:

APPLICANT: Fujlo SUZUKI et al.

ITILE OF INVENTION: CHONDROMODULIN-I PROTEIN

NUMBER OF SEQUENCES: 12

CORRESPONDENCE ADDRESS:

ADDRESSEE: Wenderoth, Lind & Ponack

STREET: 805 Fifteenth Street, N.W., #700

CITY: Washington

STATE: D.C.

COMPUTRY: U.S.A.

IP: 20005

COMPUTRY: D.S.A.

ZIP: 20005

COMPUTRY: D.S.A.

ZIP: ABADABLE FORM:

MEDIUM TYPE: Diskette, 5.25 inch, 500 Kb

COMPUTRY: STREAM SYSTEM: MS-DOS
                                                                                                                                                                                                                                                                  or C"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             986 GIGGCCCGCAIGCIGGGGAGGGICIAA 1012

CDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genome Sciences Center and Genome Science Laboratory in RIKEN. Division of Experimental Animal Research in Riken contributed to prepare mouse Lissues. First strand cDNA was primed with a primer [5' AGGAGAGAGAGAGAGAGAGACATTITITITITITIVIN 3'), cDNA was and subsequently enriched for full-length by cap-tranper: cDNA went through one round of normalization to Rot = 10.0 and subtraction to adapter of sequence [5'
                                                                                                                                                                                                                                                                                                                                                                                                                                                   /proteIn_id="BAC25447.1"
